Perfume Monster is a collaborative machine that people use to make perfumes. The overall feeling of the machine gives a hard feeling and the overall basic base is mechanical.

### Touch Screen + Bluetooth + Image Interpreting

The user can send an image to Perfume Monster to make the perfume/diffuser that reminds the image. For example, it will make light tangerine, ocean breeze and fresh air perfume if the user sends an image of Jeju-island in Korea which has a lot of tangerine trees. Also, it has a touch screen to make a user-friendly interface.

### Emotion + Communication

It has various face emoji style-emotion with LED which reacts when a human requests an order. Since it has the ability to communicate and is cute, people would feel comfortable to request orders and talk about their specific needs.

### Scent Extracting

When people ask for additional scents, machines make them. If the machine doesn't know exactly what the scent is, people can put something that actually exists and demand the scent. For example, if people add a rose petal, it makes the specific rose scent perfume.

# PERFUME MONSTER

## Short story

"Hey perfume monster"

"Yes Juyeong"

"Can you make the scent of Cheonju city in Korea? I miss my hometown today. I am sending you a Cheonju photo and location information."

Perfume Monster makes your dream scent come true! It is a commensalism based interactive machine that support humans's mental health and environment happiness with personalized perfume/diffuser making. Perfume Monster will design you specific scents by having a conversation with human or extracting scent from "extracting box" that is built in the body.

As a pair of collaborator: humans and machine, Perfume Monster, they work together to find out ultimate scent that humans want. There are Aromatherapy that heals humans with scents. Likewise, Perfume Monster and humans seek for certain scents together, at the same time, the journey to find that scents together by having conversations and adding more scents activities are also a therapeutic experience.
